1. Типова структура статті

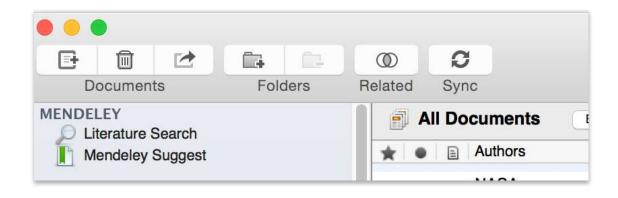

Наукова стаття

- Представляє нові оригінальні результати, або методи досліджень;
- Розширюю знання в певній галузі;
- Представляє уточнення, або іншу інтерпретацію результатів, які були опубліковані раніше;
- Огляд результатів у певній галузі.

Зберігайте, ЧИТАЙТЕ та коментуйте

1.2 Підготовка рукопису

Етапи роботи над статтею

- Ідея та методологія дослідження;
- Проведення дослідження;
- Підготовка результатів дослідження для публікації;
- Вибір журналу для публікації;
- Підготовка рукопису згідно з вимогами журналу;
- Рецензування рукопису;
- Опублікування статті;
- Просування статті та моніторинг її використання.

Dear Schneider.

Hope you are doing well!!!

We are in the process of releasing our upcoming issue in this month and so cordially inviting you to contribute your valuable research work to our journal which may advance our current knowledge about International Journal of Allergy and Asthma and its related researches.

We appreciate your submission on/before 30th of November 2017 to this Email, so that we can process for our issue release.

All published articles will be provided with digital object identifier (DOI) issued by Crosseref

Hope your thoughts would help the scientific community globally. Thank

Kind Regards, Susan Smith, **Editorial Coordinator**

Disclaimer: You have received this email because of your eminence and expertise. However, if you do not want to receive any email in the future from International Journal of Allergy and Asthma and then please reply us

LIST OF PUBLISHERS

Beall's List:

Potential, possible, or probable predatory scholarly openaccess publishers

This is a list of questionable, scholarly open-access publishers. We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. In a few cases, non-open access publishers whose practices match those of predatory publishers have been added to the list as well. The criteria for determining predatory publishers are here.

Будьте обережні, коли....

- Обіцяють швидку публікацію статей, або існують інші ознаки того, що видавець незацікавлений у проведені сумлінного рецензування;
- Вказано неповну контактну інформацію, незрозуміло, де знаходиться головний офіс видавництва;
- Видавець публікує журнали з надмірно широким тематичним охопленням (ймовірно для того, щоб публікувати більше статей та отримати більший прибуток від авторів);
- Представлені «Вимоги до авторів» дослівно (або з дуже незначними правками) скопійовано з сайтів інших видавництв;
- Видавець надто активно використовує спам-повідомлення для промоції своїх журналів;
- Видавець експлуатує бренд «іноземних країн», наприклад, використовує у назві журналу «Канадський», чи «Швейцарський», але при цьому ні засновник, ні видавець, ні редактор... ніяк не пов'язані з Канадою, чи Швейцарією;
- Видавництво безпідставно використовує у своїй назві слова «Network», «Center», «Association», «Institute», чи зловживає пафосом, а-ля «провідний видавець» тощо.

How you can support Retraction Watch

Gentle readers: Since August of 2010 when we launched Retraction Watch, you've showed us plenty of love, for which we are ever grateful. Your encouragement, story tips, and critiques are what make the site what it is. It's great to know that we

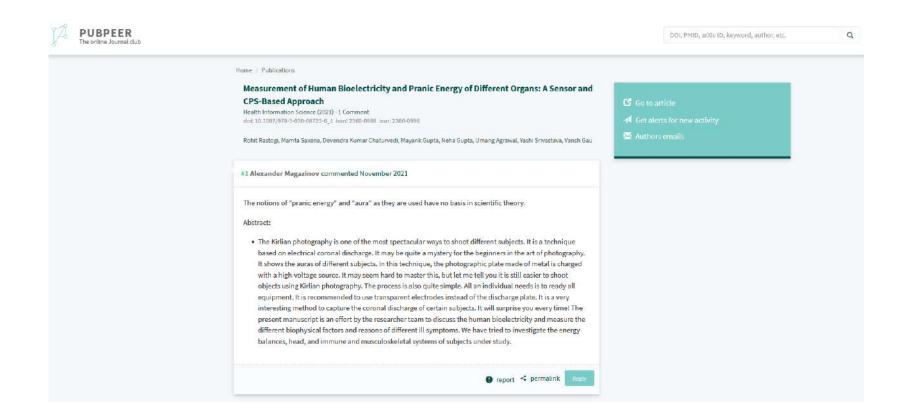

are providing you with a valuable source of information that has helped focus public attention on scientific misconduct and the process of selfcorrection.

Now, we're hoping some of you will consider making a financial contribution. To continue to grow Retraction Watch, we will need resources. Please consider supporting our blog financially by becoming a paying subscriber at a modest level (or, if the spirit moves you, at an immodest level — we'll take that, tool).

English Communication for Scientists Table of Contents

► UNIT 1 Communicating as a Scientist

This first unit will help you understand what makes communication effective and will help you identify your purpose and analyze your audience in terms of its level of specialization. It then proposes basic strategies to address less specialized audiences and mixed audiences, whether orally or in writing.

1.1 Understanding Communication

Effective communication is about getting your message across. It is centered on the audience and takes the specificities of the medium into account. It respects the intelligence of the audience members without overestimating their knowledge.

1.2 Identifying Your Purpose and Audience

Readers and listeners vary in how much they know about the topic you discuss and in how familiar they are with the context. Knowing your purpose and audience helps determine your strategy.

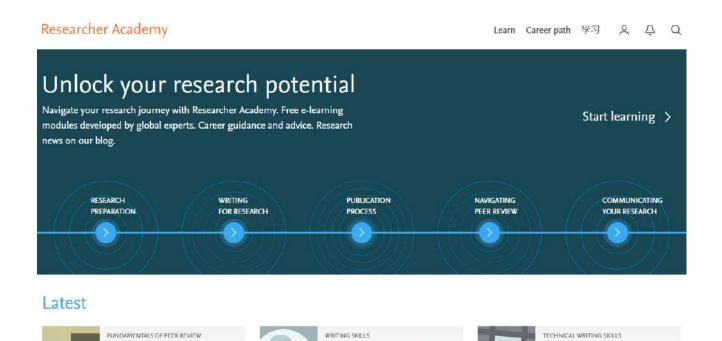

1.3 Writing or Speaking for Specific Audiences

As a scientist, you may find it challenging to present your work to a less specialized audience. More challenging still is addressing a mixed audience of both specialists and nonspecialists.

How to publish? – Step by step

If you plan to submit an article to one of our journals, or have any questions during the publication process, this helpdesk will guide you through manuscript submission, production and the services you can expect after your article's publication.

1. Before you start

The following topics will be important during the early stages of writing your article.

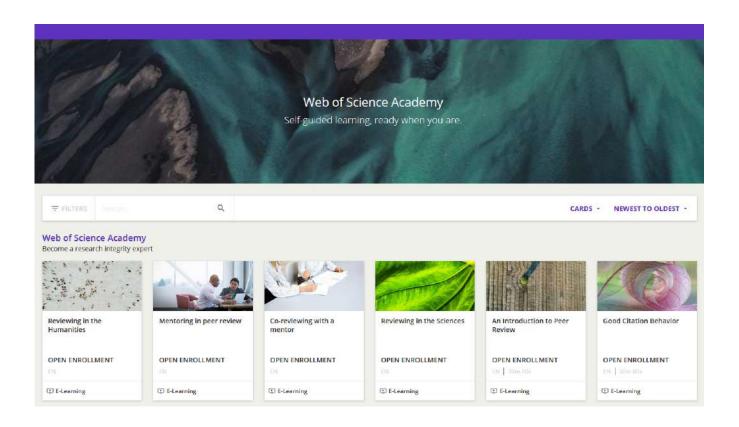

- · Publishing Ethics
- Open Access
- Impact Factor
- · Rights, permissions and licensing
- · Copyright and plagiarism
